Feature Planning (July → December)

Feature Details

1. Add procedures (July → December)

Continuously enrich our database with relevant procedures for users:

- User needs analysis
 - Quality and consistency control
-

2. Add accessibility features to the extension (July → December)

Ensure the extension complies with accessibility standards (WCAG):

- Keyboard navigation
 - Enhanced color contrast
 - Screen reader compatibility
 - Real-world usability testing
-

3. Chatbot answering questions from a webpage (September)

Develop a chatbot that understands and responds to the content of the webpage:

- HTML parsing and DOM extraction
 - Use AI to respond
-

4. Calendar integration (September → October)

Synchronize tasks with external tools:

- OAuth authentication
 - Google Calendar and Outlook API integration
-

5. Improve roadmap generation (July → October)

Refine AI-generated roadmaps to be more accurate and structured:

- Use Agentic AI
 - Connect AI to internet with tools
 - Can update dynamically roadmap in database
-

6. iOS Accessibility (November → December)

Ensure the app is fully functional and accessible on iOS devices:

- UI/UX adaptation
 - Deployment to App Store
-

Final Summary

All features have been evenly scheduled between **July and December**, ensuring a continuous workflow, progressive validation, and strategic focus aligned with the project timeline.
